

Changing Behaviour

Behavioural Strategies to increase positive behaviours

Overview

Many people are using unwanted behaviours but really don't want to be ... they simply do not know what new positive behaviours to use instead. Using desired behaviours is a skill; a skill that often needs to be taught and not expected that people know how to do automatically ... just like learning to read or driving a car; we all need the opportunity to learn new skills! People frequently use unwanted behaviours in response to challenges they are experiencing & currently do not know how to respond to this same experience by using desired behaviours. Whether it be a 3-year-old or a 60-year-old; we all have used unwanted behaviours at some time, and will again in the future unless we are taught to respond differently. If we want to see new positive behaviours, we must teach what we want to see!

Objectives

This course will support people to firstly understand why people use certain behaviours and with this information influence positive behaviour change in self or other people. Attending this unique and hands on workshop will provide you with a new and innovative experience in the application of individualised behavioural strategies. Use of real case examples and the opportunity to practice learned strategies throughout the workshop allows for a true understanding that can be integrated into your every-day-life.

The focus of this workshop will be on learning skills-building behaviour strategies (teaching new positive behaviours) and preventative strategies as opposed to reactive strategies (only responding once the unwanted behaviours have occurred).

"The more time we are using wanted behaviours the less time we have available to use the old unwanted behaviours"

Who should attend

Any person spending time with a person using unwanted behaviours ... whether that is yourself or another person!

Employees from: Education Services, Disability Services, Mental Health Departments, Medical Services, Justice Departments, Welfare Agencies, Residential Support Networks, Legal Services & other Health & Human Services

Supporters of people who use unwanted behaviours including parents, partners, siblings, grandparents, relatives and friends

Individuals wanting to gain insight into their own unwanted behaviours

Testimonials

"I came to this course to learn to understand my son. I have left with a better understanding of myself, my husband and my mother in law & feel a new sense of control in going back to my life. Thanks Tan".

Hobart Mother

Terrific session, really glad I attended and I will recommend to school staff and support workers.

Dr Sandra Jones, University of Wollongong

Most other seminars are useful, but give nothing practical to take away. These seminars are brilliant in that the resources can be used!

Lilian Lomanaco - DETA

I can't wait to try the new ideas! Very easy to listen to, practical ideas and excellent resources to take away.

Alison Hammond, St Josephs School Grafton

A very practical approach to managing people with extremely challenging behaviour.

Julie Thompson, DECS Riverland Office

Course Outline

Module 4

Understanding Behaviour

- 1 10 Behaviour Assumptions
