

Assessments

Cognitive Assessment

Fabic provides Cognitive Assessments to bring insight to an individual's **intellectual** strengths and weaknesses.

Understanding a person's learning profile can help to identify any areas of deficit or giftedness they may have. The results assist in gaining an understanding as to how a person is likely to learn, receive, process and use new information presented to them. These insights can then be used in the development of a personalised plan.

At Fabic we use a cognitive assessment framework to work out the main strengths and weaknesses related to learning profiles, executive function, attention disorders, intellectual disabilities and giftedness.

Purpose

To bring greater insight into an individual's intellectual strengths and weaknesses.

Outcome

A detailed report with the information and insights on the individual's intellectual strengths and weaknesses with a series of recommendations to establish specific teaching practices that enhance their future skills development.

What's involved?

The Cognitive Assessment consists of:

- An initial interview with a primary carer
- Up to four testing sessions with the student
- A detailed report of the student's learning strengths, weaknesses and our recommendations
- A feedback session to discuss the information in the report with the carer

Tests administered:

- Weschler Individual Achievement Test – 2nd edition (WIAT-II)
- Peabody Picture Vocabulary Test – 4th edition (PPVT-4)

How long?

It takes about four weeks from the first meeting until you receive the final report.

Where?

The meetings take place at our Fabic office in Carrara, or in our satellite offices in Lismore or Brisbane, depending on what best suits the client.

What it costs?

Assessments and report writing are a standard rate of \$180.00 per 50 mins . Quotes are offered to address each individual situation.
