

# COMBINED COGNITIVE AND EDUCATIONAL ASSESSMENT

## PURPOSE

This assessment provides a well-rounded understanding of a person's natural intellectual ability as well as their current academic achievement. The information is then used to support a person to most effectively navigate their natural settings and learning experiences across their life span.

This assessment is supportive when there may be suspected learning difficulties influencing how a person is experiencing their learning environment, including signs of anxiety and non-preferred or unwanted behaviour of any kind or intensity.
